HIGHLIGHTS California's seasonally adjusted unemployment rate for November was 6.7 percent, up from the 6.0 percent in October. A year ago, in November, the rate was 5.1 percent. During November in California, seasonally adjusted employment decreased by 107,000 over the month while unemployment increased by 90,000. The number of job losers increased from 382,800 in October to 489,200 in November. The number of job leavers decreased by 10,000 during the month. The national civilian seasonally adjusted unemployment rate for November was 5.9 percent, up from the 5.7 percent in October.

Total nonagricultural wage and salary employment, not seasonally adjusted, increased by 46,500 from 12,863,800 in October to 12,910,300 in November. The largest increase in employment was in the trade sector with a gain of 36,800 jobs, most of which occurred in retail. Other sectors that registered increases were government with 23,900 additional jobs; services with 4,100; and finance, insurance and real estate with 1,700. After adjusting November's data for seasonality, employment grew in only three of the eight major nonagricultural sectors. The largest gain was 5,900 jobs in government with very small increases in services and finance, insurance and real estate. The largest decrease in jobs occurred in manufacturing with 6,100, followed by trade, transportation and public utilities, construction, and mining. Job losses in the manufacturing sector were spread throughout most of the components in durable goods; this marks the eighth consecutive month that seasonally adjusted employment in manufacturing has decreased. Since November 1989, total wage and salary employment, not seasonally adjusted, has increased by 169,600, a gain of 1.3 percent over the year. During October, average weekly earnings and average weekly hours worked in manufacturing decreased to $471 and 40.6, respectively.

*Because of a relatively small sample, the monthly estimates for data in Table 2 do not always appear to reflect real labor market conditions. Therefore, these figures are a three-month moving average instead of monthly data. For example, July's data are an average of May, June, and July. August's data are an average of June, July, and August.

FOOTNOTES TO TABLES

* Data not published on the 1972 SIC code. This is a new composition of the industries included or the industry is new.

** Data for 1988 and 1989 are not comparable with prior data because of the SIC code revisions (changed from the 1972 SIC code to the 1987 SIC code).

A. Does not include employers, own-account workers, unpaid family workers, domestic servants and agricultural workers. Figures for the current month are preliminary and are subject to revision.

B. Does not include force-account and government construction workers.

C. Includes all civilian employees of Federal, State and local governments regardless of the activity in which the employee is engaged.

D. Includes all employees at the city and county of San Francisco.

E. Average hours and earnings are based upon data for full-time and part-time production and related workers in manufacturing and mineral extraction industries, construction workers in construction and nonsupervisory employees and working supervisors in other industries. Average gross weekly and hourly earnings include overtime pay and premium wages for late-shift work. Attention is directed to the fact that these are not wage rates but are averages of the gross earnings. Figures for the current month are preliminary and are subject to revision.
